

## Episode 222: Can Collecting Too Much Data Cause Problems?

**Date :** May 8, 2018

In this week's TechLaw10 Jonathan reflects on his trip to Utah assessing GDPR compliance.

Jonathan and Eric talk about the growth of data centres and how that industry has changed since the 1980s.

They look at the consequences of holding too much data, both in terms of regulatory requirements (like GDPR) but also the litigation risk. Eric talks about the consequences of too much data from a US perspective and they finish with five top tips from Jonathan on final GDPR preparations for a US business.

**TechLaw10** is a 10-minute audio podcast update from U.S. lawyer [Eric Sinrod](#) (Duane Morris) and UK lawyer [Jonathan Armstrong \(Cordery\)](#) where they share insights on developments where technology intersects with the law in the EU and the U.S. These well-known commentators are sought out in the media for their opinions on breaking news and developing trends. Whether you are in North America or Europe, now you can hear directly from them regarding the latest technology issues at home and across the pond.
