

Episode 144: Commercial aircraft hacking danger

Date : April 28, 2015

This week's podcast looks again at the risks to flight safety posed by in-flight Wi-Fi. The US Government Accountability Office (GAO) has expressed its concern about the security of modern aircraft. According to a recent GAO report: "Modern aircraft are increasingly connected to the Internet. This interconnectedness can potentially provide unauthorized remote access to aircraft avionics systems." How real is the risk? What can airlines do to reduce it?

TechLaw10 is a 10-minute audio podcast update from U.S. lawyer [Eric Sinrod](#) (Duane Morris) and UK lawyer [Jonathan Armstrong \(Cordery\)](#) where they share insights on developments where technology intersects with the law in the EU and the U.S. These well-known commentators are sought out in the media for their opinions on breaking news and developing trends. Whether you are in North America or Europe, now you can hear directly from them regarding the latest technology issues at home and across the pond.
