

## Episode 156: Identity control via subject access requests

**Date :** September 15, 2015

This week's podcast looks at a rise in the number of subject access requests (SARs). SARs are a common feature of data protection laws across Europe and enable individuals to request information organisations hold on them. SARs are becoming increasingly common and may be about to increase in volume with changes in the law. Our podcast talks through some of the issues and why organisations need to be prepared.

**TechLaw10** is a 10-minute audio podcast update from U.S. lawyer [Eric Sinrod](#) (Duane Morris) and UK lawyer [Jonathan Armstrong \(Cordery\)](#) where they share insights on developments where technology intersects with the law in the EU and the U.S. These well-known commentators are sought out in the media for their opinions on breaking news and developing trends. Whether you are in North America or Europe, now you can hear directly from them regarding the latest technology issues at home and across the pond.
