

Episode 255: The Role of Third-Parties in Data Breaches

Date : August 22, 2019

In this podcast Eric and Jonathan talk about the role of 3rd parties in data breaches.

Many corporations now rely on 3rd parties to process data for them on their employees and customers.

Third party security breaches have been a real feature of many of the largest data breach investigations recently including British Airway (<https://www.corderycompliance.com/uk-dpa-to-fine-ba-for-data-breach/>) and Equifax (<https://www.corderycompliance.com/equifax-fined-by-uk-data-protection-regulator-2/>).

In this podcast, Jonathan and Eric discuss the issues and give some quick tips on things to look at to lessen the risk.

Jonathan also talks a bit about Cordery Breach Navigator (<https://www.corderycompliance.com/lexisnexis-launches-cordery-breach-navigator/>) which can be an effective way of managing data breaches, determining which are the most serious and helping report to regulators.

TechLaw10 is a 10-minute audio podcast update from U.S. lawyer [Eric Sinrod](#) (Duane Morris) and UK lawyer [Jonathan Armstrong](#) ([Cordery](#)) where they share insights on developments where technology intersects with the law in the EU and the U.S. These well-known commentators are sought out in the media for their opinions on breaking news and developing trends. Whether you are in North America or Europe, now you can hear directly from them regarding the latest technology issues at home and across the pond.
