

Episode 259: Risks of Collaboration and Deep Pocket Litigation in AI and Cutting-Edge Tech

Date : November 18, 2019

In this episode of TechLaw10 Jonathan and Eric discuss the topic suggested by a regular listener.

They talk about how companies are increasingly collaborating with others to bring products and services to market – especially in areas like machine learning, AI and facial recognition. Can this collaborative approach combined with the ‘Deep Pocket’ nature of litigation result in corporations underwriting the compliance of their suppliers large and small? If so, what steps can you take to mitigate risk?

We are grateful to Jean-Pierre Mistral, the Director of Global Data Privacy at Gemalto, for suggesting this weeks topic.

TechLaw10 is a 10-minute audio podcast update from U.S. lawyer [Eric Sinrod](#) (Duane Morris) and UK lawyer [Jonathan Armstrong \(Cordery\)](#) where they share insights on developments where technology intersects with the law in the EU and the U.S. These well-known commentators are sought out in the media for their opinions on breaking news and developing trends. Whether you are in North America or Europe, now you can hear directly from them regarding the latest technology issues at home and across the pond.
