In this episode Jonathan Armstrong and Tom Fox discuss issues relating to data privacy, data protection and GDPR.

Today they consider the intersection of Closed Circuit Television (CCTV) and data privacy.

Some of the highlights are:

- CCTV is everywhere in the UK. Why is a DPIA so critical in GDPR compliance around this issue?
- What about the safety implications for CCTV?
- What about Subject Access Requests?
- Transparency is critical. This means full notice to all employees.
- What should be your retention policy?
